

## P ROFILE

ACLT Computing Incorporated is a 100% Filipino-owned software-development company specializing in Human Resource Information System solutions and other related Services.

Founded in August 8, 1994, ACLT initially started as a middleware developer to one of the most popular financial systems in the country. Inspired to create localized business applications to fit the growing demand of the Philippine market, ACLT in 1995, launched the PRIME SYSTEM - an application focused mainly on giving Payroll solutions.

ACLT continues to grow along with its market share in the human resource management field. From Payroll software application, PRIME HUMAN RESOURCE INFORMATION has evolved to become complete HRIS package.

## V ISION

We are the preferred global provider of quality Human Resource Information System Solutions .

We forge enriching long-term relationship with customers by providing quality and reliable service that exceeds expectations.

We nurture our employees by providing an environment for their personal development and professional growth.

We offer best returns for our stockholders.

We commit ourselves to society by advancing technologies that enhances human potential.

# ACLT Computing, Inc.
